New : Protection Racket's Triple AAA (Access All Area – All Accidents Averted) Drum Case Range

Life on the road is tough... and your gear needs the best protection from the rough and tumble that all drums are subjected to. From knocks and dints, and falls and spills, drum cases are the answer to keeping your drums safe. We're not just talking any case... this is the best case ever offered by Protection Racket!

Introducing The Triple AAA (Access All Area – All Accidents Averted) Drum Case Range... super tough, Poly-Carbonate frame cases with all the benefits of Protection Rackets unique drum case technologies.

Utilizing strong, lightweight advanced polymers, Protection Racket have created **Triple A-Plex™**, a Poly-Carbonate frame which offers exceptional resistance to impact. This forms the core of their new AAA drum cases, around which Protection Racket have added their tried and tested inner and outer drum case components. This combination of materials has formed Protection Rackets newest material; **Rocket Foam™**!

Rocket Foam™ is utilized inside each AAA case to provide excellent protection against knocks and trauma during transit, from even the biggest Space Cadet!

Rocket Foam™ is the combined use of the new **Triple A-Plex™** poly-carbonate frame, lined on the inside with 10mm and outside with 5mm closed cell foam of the frame. It really sets the new AAA range apart from the competition.

The inner walls have PR's Propile™ technical fleece lining, keeping your drums snug, safe and warm, and the outer of the cases are finished in Protection Racket's tried and tested 600 denier polyester Racketex™, 100% waterproof and extra durable.

Finishing touches include new polyester/plastic/neoprene ergonomic handle for extra comfort and longevity and the heavy duty spiral chain zips are double stitched-in and totally water and rot proof.... but not quite bomb proof!!

Incredibly light, these cases still weigh much less than the average 2-piece hard case and are so strong you can stand on them. The perfect combination of hard and soft.... your drums deserve the best protection, now you can give them the five star treatment with Protection Rackets AAA range.
